Education

University of Essex <i>Master of Science in Data Science with Distinction</i>	<i>Oct. 2023 – Oct. 2024</i>
University of Mumbai <i>Bachelors of Engineering in Mechanical Engineering</i>	<i>Aug. 2018 – May 2022</i>

Skillset

Tools: Python, R, Excel, Power BI, SQL

Technologies: Advanced Statistics, Natural Language Processing, Overleaf Latex, JIRA

Machine Learning Algorithms: Tree based algorithms, Regression Analysis, XGBoost, LSTM, Artificial Neural Networks.

Experience

School of Rehabilitation, Exercise and Sciences, University of Essex <i>Research Officer</i>	<i>Feb. 2025 – April 2025</i> <i>Colchester, Essex, UK</i>
--	---

- Conducted in-depth data analysis using advanced Python and SQL; created visualizations and dashboard triangulate insights from datasets using PowerBI.
- Developed dynamic, reusable code in Python with an instruction file, allowing non-technical sports scientists to independently triangulate and uncover the trends in a particular sport.
- Collaborated with project lead and supervisor to extract insights from two datasets for a forthcoming research publication

School of Computer Science and Electronic Engineering, University of Essex <i>Research Assistant</i>	<i>Oct. 2024 – Feb. 2025</i> <i>Colchester, Essex, UK</i>
--	--

- Explored the potential of AI on data from a digital twin of a waste recycling plant; carried out extensive data wrangling and smart aggregation of 38GB of data to improve quality, accuracy, and overall model performance
- Identified LSTM, Random Forest, and XGBoost as top-performing models for accurate predictions; and handle anomalies, uncovered 48–50 irregularities per week using statistical methods
- Authored report in IEEE research paper format in latex in collaboration with project lead and supervisor .

School of Computer Science and Electronic Engineering, University of Essex <i>Graduate Lab Assistant</i>	<i>Oct. 2023 – Mar.2024</i> <i>Colchester, Essex, UK</i>
--	---

- Mentored over 40 undergraduate students through complete data science project lifecycles, from ideation to deployment.
- Delivered instructional sessions on core data science concepts and ML algorithms, breaking down technical topics into practical, real-world examples through clear and impactful communication.

AI Variant <i>Data Science Intern</i>	<i>Sep. 2022 – June 2023</i> <i>Mumbai, India</i>
---	--

Deployed 4 end-to-end machine learning models on streamlit, which are as follows:

- Deployed 4 end-to-end ML models using Streamlit across HR, automotive, telecom, and finance domains.
- Achieved 70%+ accuracy in all projects using EDA, feature engineering, ML algorithms, and NLP techniques.
- Collaborated with team and supervisor to gather domain requirements and incorporate feedback iteratively.

Academic Project

Master's Thesis: Tesco Ingredients Analysis using Natural Language Processing.	Github link 
---	---

- Designed a healthiness classification system using ingredient vectorization and five ML models on a structured dataframe.
- Extracted text from food labels using Tesseract OCR and trained a Custom NER model with spaCy to highlight key ingredients.
- Held biweekly meetings with supervisor, incorporated feedback promptly, and met all deadlines ahead of schedule.

Certifications and Recognition

- Data Science Certification issued by ExcelR
- Excel: Mother of Business Intelligence Certification issued by CodeBasics
- Developed a prototype app, "Saviors," during BYTECAMP, an intercollegiate hackathon (February 2019).
- Volunteered for 9 months at an Indian NGO, teaching basic English and Math to underprivileged children.
- Google Data Analyst Certification: Data Analysis using R
